

SUBPART A - REVIEW AND APPROVAL

PA-501.04(c)(2)

PA-501.03 Compliance of engineering work with laws and regulations.

(4) Licensed Engineers are authorized to seal designs which were done under their direct supervision and are within their delegated approval authority.

(5) In addition, where regulations require as-built documents to be sealed, engineers are authorized to seal such documents for construction which was done under their direct supervision and are within their delegated authority.

(6) Sealing should include any disclaimers needed to state the limitations of this seal, e.g. "The affixed seal warrants only that the NRCS engineer is the 'Engineer of Record' for the overall design. The seal does not ascertain that the construction was or will be done in accordance with this design." A similar disclaimer should be used for as-built documents.

(7) The authenticity of the seal will be ensured by using an ink stamp with a red ink signature or crimped impression.
